

Hi Dr. Timothy Harcourt, Board Certified Chiropractic Orthopedist. You may be surprised to find out what you might lose if you don't watch this video.

Spinal injury is commonly caused by an automobile accident, boating accident (in particular getting in and out of a boat), and also sports-related injury. Symptoms to be wary of and concerned about include not only neck and back pain, but the inability to do normal activities of daily living such as sleeping, bending, lifting, having normal physical relations, or having a difficult time going to work and doing what you normally do throughout the day.

Significant warning signs which would point to getting help right away would include arm or leg pain, numbness and odd feeling and the arms, the fingers, the legs, and the toes; nausea, blurred vision, dizziness, foggy head, or a feeling of disconnectedness to the things and the people around you memory loss and unusual impatience or grumpiness as noticed by people close to you.

What do you stand to lose by ignoring these warning signs? Well, in the state of Florida the first thing you stand to lose is \$10,000 coverage. After January first 2014, if you don't see a doctor within the first 14 days after your accident. You may also be likely to lose the ability to move freely, getting more restricted and painful in your movements over time. Degenerative change of the spine is the result of persistent rusty hinges that are likely developed if you choose to ignore getting proper chiropractic care.

Above and beyond you stand to lose the quality of your life that you work so hard for your whole life. If you can't do the things that enjoy such as boating walking swimming dancing golfing and playing tennis are getting together with friends then what good is it to you and those are around you.

If you were given a choice between feeling like a million dollars are having a million dollars which one would you pick? Let's face it if you feel like a million you can make a million if you feel lousy it will be difficult to enjoy much of anything.

We'd love to see here at the practice! Call us if you have any questions or scheduled appointment with me to see if I can help you we look forward to seeing you soon thank you.

Hi, it's Danny Yanchewski; I'm the office manager here for Dr. Harcourt at Coast Chiropractic Centers. You know Dr. Harcourt is not only a Chiropractic Physician for 27 years but is the only Board-Certified Chiropractic Orthopedist in Fort Myers listed by the Academy of Chiropractic Orthopedist. Additionally Dr. Harcourt is the author and developer of the exciting SONOMA method, which identifies and quantifies your spinal function to ensure your maximal improvement in the proper time frame; no more and no less.

To schedule an appointment with us, so that you don't lose your ten thousand dollars in PIP medical coverage call us sooner, rather than later. Remember if you wait past 14 days you will have no auto coverage.

Thank you so much for watching and have a wonderful day.
