

Been in a car accident? I'm so sorry to hear that.

We do have you covered and we can do something about it here for you, however.

We have the Sonoma method which I developed with Penn State University. This method helps to evaluate and make sure that you're back to the highest level possible.

Remember, when you have an accident in state of Florida the law mandates that you see somebody within 14 days, we have you covered.

We have therapies here to help; interferential current, ultrasound, intersegmental traction. If you want to get better a lot faster, we have the opportunity for the exciting high-dosage laser therapy.

Should you need something on the backend, permanent impairment rating, we can do that.

Move better, feel better, live better.
